EXPERIENCE

Self Employed, South Jordan UT - *Freelance Web Developer*

May 2020 - Present

- Design, Develop and maintain clients websites
- Communicate verbally/written with clients to make sure their business needs are satisfied.
- Educate clients on how to market their business.

Projects

TLC Medical Transport

- TLC serves clients throughout the Southern California area by providing the highest quality and most efficient door-to-door local and long distance non emergency medical transportation.
- This website was built with Gatsby.js which is a React library. The content on this site is managed through Contentful and GraphQL to store data. Users can also purchase products and check out securely with Snip Cart API.

Trade and Play

- Trade and Play is an application that allows users to register and signup using Passport.js for authentication. A user can collect NHL sports cards through booster packs and build a collection. Future plans for this project would be to allow users to trade cards with other users on the application. This project was built with the MERN stack and I was in charge of database management and user authentication.

Employee Directory

- React js front-end application allows users to view their entire employee directory at once so that they have quick access to their information. Currently employees are being brought in from the RandomUsers.me API
